- Stadiums
- Ports
- Multi-Dwelling Units (MDUs)
- Municipalities/Cities/Counties

### CAPABILITIES

- Indoor and Outdoor DAS
- Turnkey DAS integrator
- Network design, installation & carrier commissioning
- All major carriers Nationwide for 3G & 4G LTE
- Wireless access points
- Installation of nodes, antennas and fiber optic cabling on existing infrastructure in multiple locations
- Commercial carrier partnerships
- Public safety enhancement
- 24/7/365 monitoring and maintenance programs
- In-building RF coverage solutions
- Consolidated emergency communication systems

Provide your visitors, customers, clients, and employees dependable, high-quality communication connections for all devices. AFL's Distributed Antenna System (DAS) is the scalable, affordable technology solution for boosting coverage indoors or outdoors, wherever signals might be unreliable.

We work closely with customers, service providers, original equipment manufacturers (OEMs), distributors, and certified business partners to give you high-quality designs and installation every time. With AFL's Carrier Coordination Program, our wireless carrier commission of certified OEM products, and our commercial carrier partnerships, AFL engages, negotiates, and consults with all stakeholders to advise you in choosing solutions that are fast and code-compliant, while enhancing public safety.
